50X1-HUM

1. A line of fortifications 25 kilometers long has been constructed between Godech (N4302 E2303) and Aldomirovtsi (N4251 E2258), approximately 30 kilometers inside the Bulgarian-Yugoslav frontier. The southern portion of this line crosses the main Dragoman-Sofia rail and highway route and is the most heavily fortified defense position along the Bulgarian-Yugoslav border.
2. Two infantry trenches have been dug along the entire line, and there are concrete machine gun emplacements at strategic positions. Immediately behind the emplacements are dug-in tank positions, the majority of which are in the vicinity of the Dragoman-Sofia highway.
